

How talks are counted, and how to spend fewer.

Your plan gives you a number of talks a month. Here is what counts as one, what happens when you change plan, and how gifting works.

WHAT COUNTS AS ONE TALK

One talk covers up to 60 minutes of the part you asked us to analyse, not the length of the original file.

YOU ANALYSE	TALKS USED
Up to 60 minutes	1
61 to 120 minutes	2
121 to 180 minutes	3

You can analyse up to six hours in one run. Longer windows are refused. Trimming a two hour service to a 45 minute sermon costs one talk, not two.

THE PLANS

PLAN	A MONTH	TALKS	WHAT IT ADDS
Free	₦0	1	Clips kept 30 days, and they carry our mark
Starter	₦15,000	4	No mark, caption styling, clips kept 90 days
Growth	₦30,000	10	Brand kit, glossary, Moments, clips kept a year
Pro	₦60,000	24	Ten people on one library, priority, clips kept while the plan is active

Pay for a year and you pay for ten months instead of twelve. Prices above are for Nigeria. Other locations use USD with different allowances. Card payments are handled by Polar. See current prices at reeluse.com/pricing.

CHANGING PLAN

Moving up applies to your account, so you can use the bigger allowance and the features it unlocks. **Moving down** applies at the end of the period you have already paid for, so you keep what you paid for until then.

On a team, only the owner sees billing. Members share the library, the brand kit and the allowance. If the owner leaves Pro, team access ends at once, and returning restores it.

GIVING REELUSE TO SOMEONE ELSE

Buy **Starter or Growth** for **3, 6 or 12 months**, and a year includes two months free. It is one payment, and nothing ever renews, on your card or theirs. You get a code as soon as you pay, and by email. They redeem it on their own account, with no card.
